Open to relocation and remote opportunities

SUMMARY

Game Programmer with hands-on experience in Unreal Engine (C++/Blueprints) and Unity, specializing in gameplay systems, AI behavior, and puzzle mechanics. Experienced in both solo and team-based development, with a strong focus on clean, scalable systems and player-driven design

EDUCATION

Bachelor of Science in Computer Game Development

Asia Pacific University, Kuala Lumpur, Malaysia

Second Class Upper Honours (CGPA: 3.18)

SKILLS SUMMARY

- **Programming Languages:** C++, C#, Python
- **Game Engines:** Unreal Engine (C++ & Blueprints), Unity
- **Gameplay & Systems:** Enemy AI, Proximity-based Behaviours, Branching Dialogue Systems, Puzzle Mechanics, Procedural Generation
- **Specializations:** VR Development, UI Systems, Narrative Gameplay Systems
- **Version Control & Tools:** Git, GitHub, Perforce

SELECTED GAME DEVELOPMENT PROJECTS

Munmun's Revenge – 3D Platformer (Unity)

Role: Gameplay Programmer / Game Designer

- Implemented enemy behavior logic in **Unity (C#)** enabling roaming behaviours and proximity-based player attacks
- Programmed enemy logic to detect the player and trigger damage on contact

- Tuned enemy movement and interaction to support level flow and challenge balance

GitHub: <https://github.com/bababuyi/MunmunsRevenge>

Reflection of the Mind – 2D Visual Novel / Puzzle Game (Unreal Engine)

Role: Solo Developer (Programmer, Artist, Writer, Designer)

- Designed and implemented a **branching dialogue system** in Unreal Engine where player choices influence character behaviour
- Developed narrative-driven puzzle mechanics integrated into story progression
- Built UI systems for dialogue, choices, and player feedback using **UMG**
- Created all visual assets, storyboards, and narrative content for the project

GitHub: <https://github.com/bababuyi/Reflection-Of-The-Mind>

Etiqua Run – Mobile Endless Runner (Unity)

Role: Gameplay Programmer / 3D Artist

- Implemented **procedural generation** of terrain and obstacles to support endless gameplay
- Programmed object cleanup systems to remove off-screen assets and maintain performance
- Created and optimized 3D assets for real-time gameplay

Just Bowling VR – Virtual Reality Game (Unity)

Role: Gameplay & UI Programmer / Artist

- Implemented physics-based bowling mechanics using collision and force interactions
- Developed VR interaction logic for grabbing, aiming, and releasing the bowling ball
- Designed and implemented VR-friendly UI systems

ADDITIONAL EXPERIENCE & ACTIVITIES

- Game Development Club Member – Asia Pacific University
- Audio Visual Team – River of Life Church (Sound Engineering & Media Support)
- Exchange Student – Rotary E-Club District 9210 (Brazil)
